# A Natural Source of Plant Nutrition

Farmers need fertilizers designed to improve organic crop production, profitability and sustainability. Infinite® fertilizers are ideal for use on a wide range of crops through soil and foliar applications.

Infinite® products are powered by vitamin-rich oilseed extract, obtained through a proprietary process, and by carbon additives, amino acids, macronutrients and micronutrients. These natural sources of plant nutrition enhance soil health and microbial activity to stimulate root and plant growth.

Unlike other organic fertilizers that are fish-based, Infinite® fertilizers feature plant-based formulations with less odor and low salt indexes. The easy-to-use liquid formulas are low in solids, which allows the application flexibility you may need to deliver key nutrients to your plants through drip irrigation.

## Sustainability is a Competitive Advantage

Whether you're growing corn in Iowa, almonds in California, wheat in Kansas, alfalfa in New York or tomatoes in Florida, all farmers want high quality, productive soil.

The truth is that your plants—whether grown conventional or organic—are only as healthy as your soil. Everything you do to your soil is done to your plants, which is why our products treat your soil with the utmost care.

Solutions 4Earth's Infinite® products join a full lineup of environmentally friendly fertilizers that create balanced and sustainable agricultural environments, allowing you to maximize your organic farming operation's

### Infinite® products also:

- Employ carbon compounds to help stimulate microbial activity, improve root development and soil quality and help remedy high salt solutions
- Contain all of the essential amino acids and micronutrients, which provides the ultimate plant balance
- Provide natural chelation of nutrients by amino and organic acids for increased micronutrient availability and uptake
- Give organic growers a GMO-free, vegan-friendly fertilizer solution, manufactured in a zero-waste facility
- Infinite® products are OMRI Listed, approved by the WSDA Organic Food Program and registered as a CDFA Organic Input Material.
